

Group no: 14

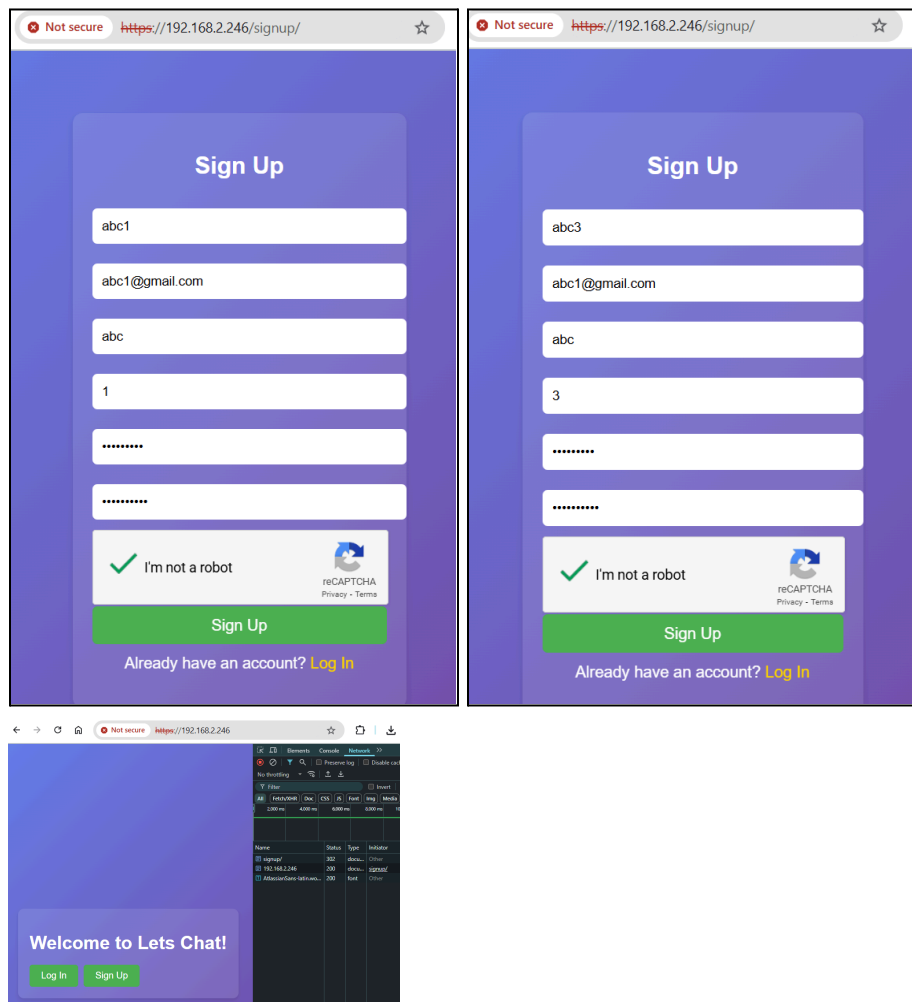

Vulnerability Type:

Functional (with bit security implication as well)

Steps to Reproduce:

- 1) Go to the url: <https://192.168.2.246/signup/>
- 2) Register a new user with email: abc1@gmail.com, username: abc1.
- 3) Register another user with the same email: abc1@gmail.com, username: abc3.
- 4) Both accounts are created without any validation errors.

Proof of Concept:

Impact:

This website allows multiple user accounts to signup with the same email id but different usernames which can cause securitysensitive workflows like in password reset or OTP login to cause them to behave unpredictably or even let an attacker hijack another user's identity.
