

Group no: 3

Vulnerability Type:

Functional

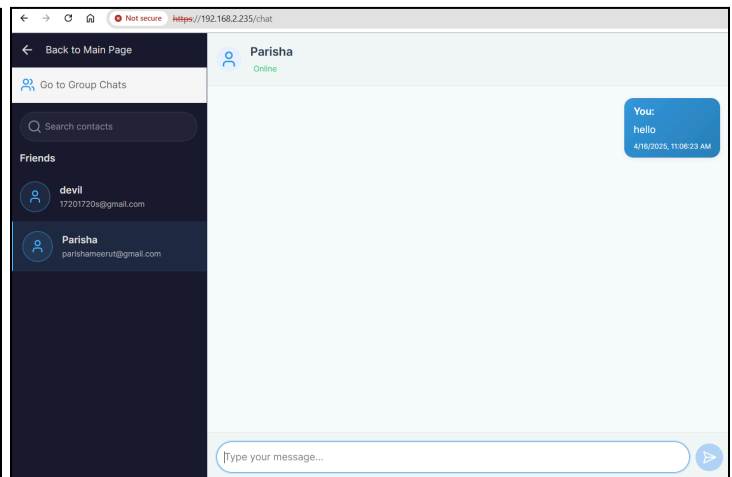

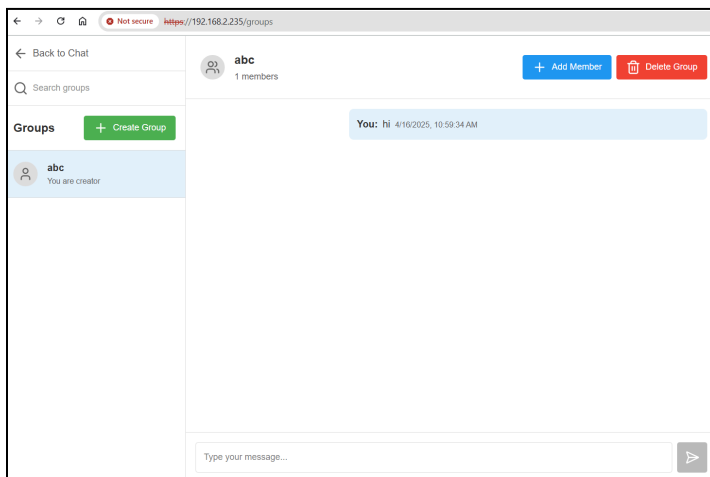

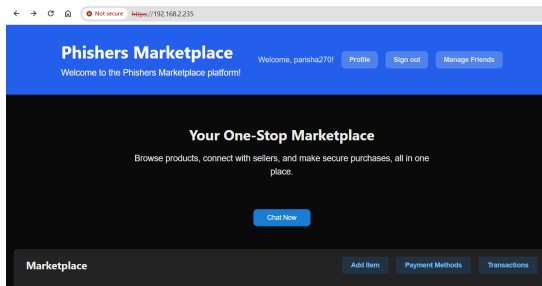

Description: In the project requirement document, it was required that users can upload media as well. But there is no such option in messages and group messages as well here.

Steps to Reproduce:

- 1) Go to the url: <https://192.168.2.235/>
- 2) Login with any existing account or with a new account.
- 3) Click on the chat now option. Go to either message to friends or to group chats.
- 4) There is no option for media sharing in any of the chats.

Proof of Concept:

I logged in and found that there is no option for media sharing. I can't share picture, video or documents.

Impact:

This violates the media sharing requirements as users can't share photos, videos, voice notes, or documents privately.
