

Group no: 14

Vulnerability Type:

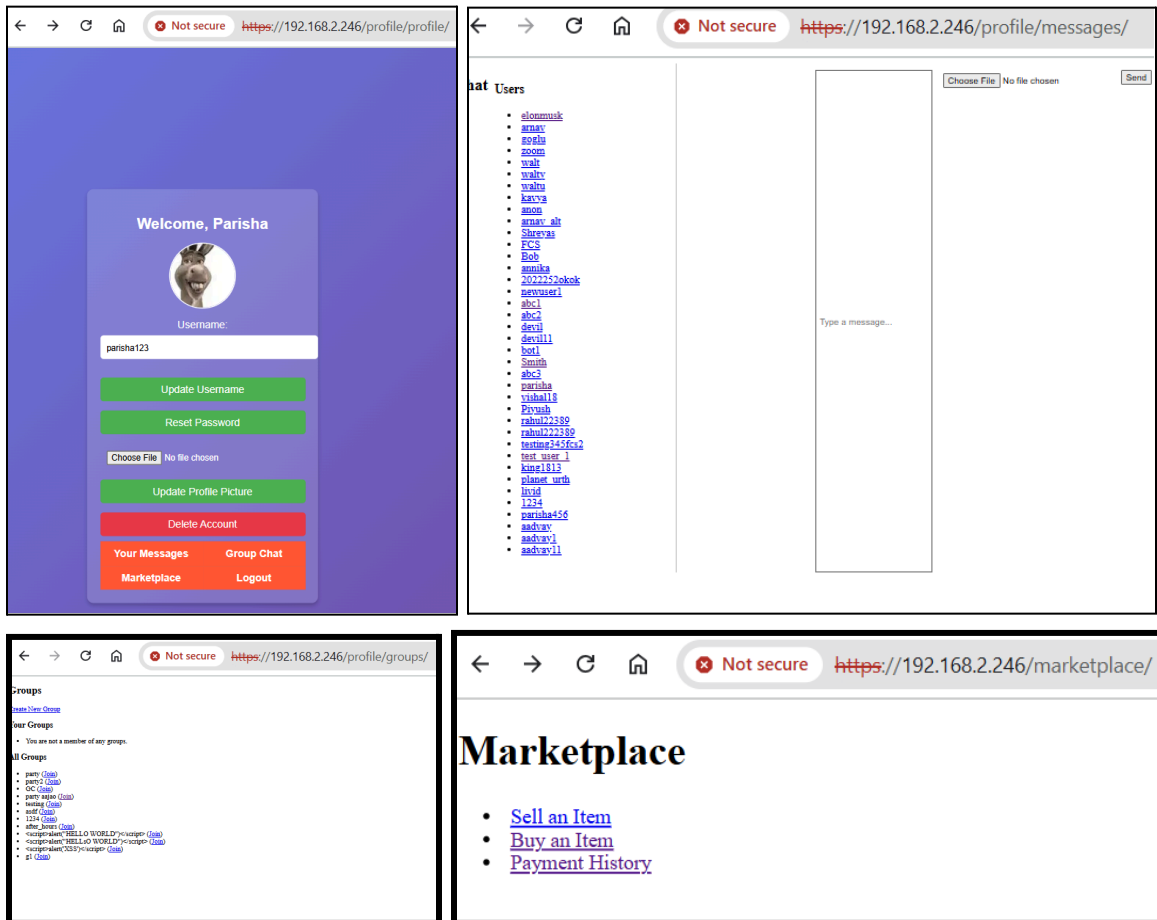

Functional

Description: There is no function to search users or for sending Follow or Friend requests to any user so that users can connect with each other.

Steps to Reproduce:

- 1) Go to the url: <https://192.168.2.246>
- 2) Login with a existing account or with anew account.
- 3) Go to the your messages tab.
- 4) There is no option to block or report a user.

Proof of Concept: I logged in with an account, username: parisha123 and went to the messages as well as groups as well. In the UI there is no option to block or report any user to the admin.

Impact:

This violates the requirement in the social features that user can follow or send friend requests to connect with any user.
