**Group no: 14**

Vulnerability Type:
Functional

Description: There is no function to block or report the users. Ih the project requirement pdf, it was written that we had to implement so that users can block or report other users others but there is no such feature in this website.

Steps to Reproduce:
1)   Go to the url: https://192.168.2.246
2)   Login with a existing account or with an new account.
3)   Go to the your messages tab.
4)   There is no option to block or report a user.

Proof of Concept: I logged in with an account, username: parisha123 and went to the messages tab. In the UI there is no option to block or report any user to the admin.
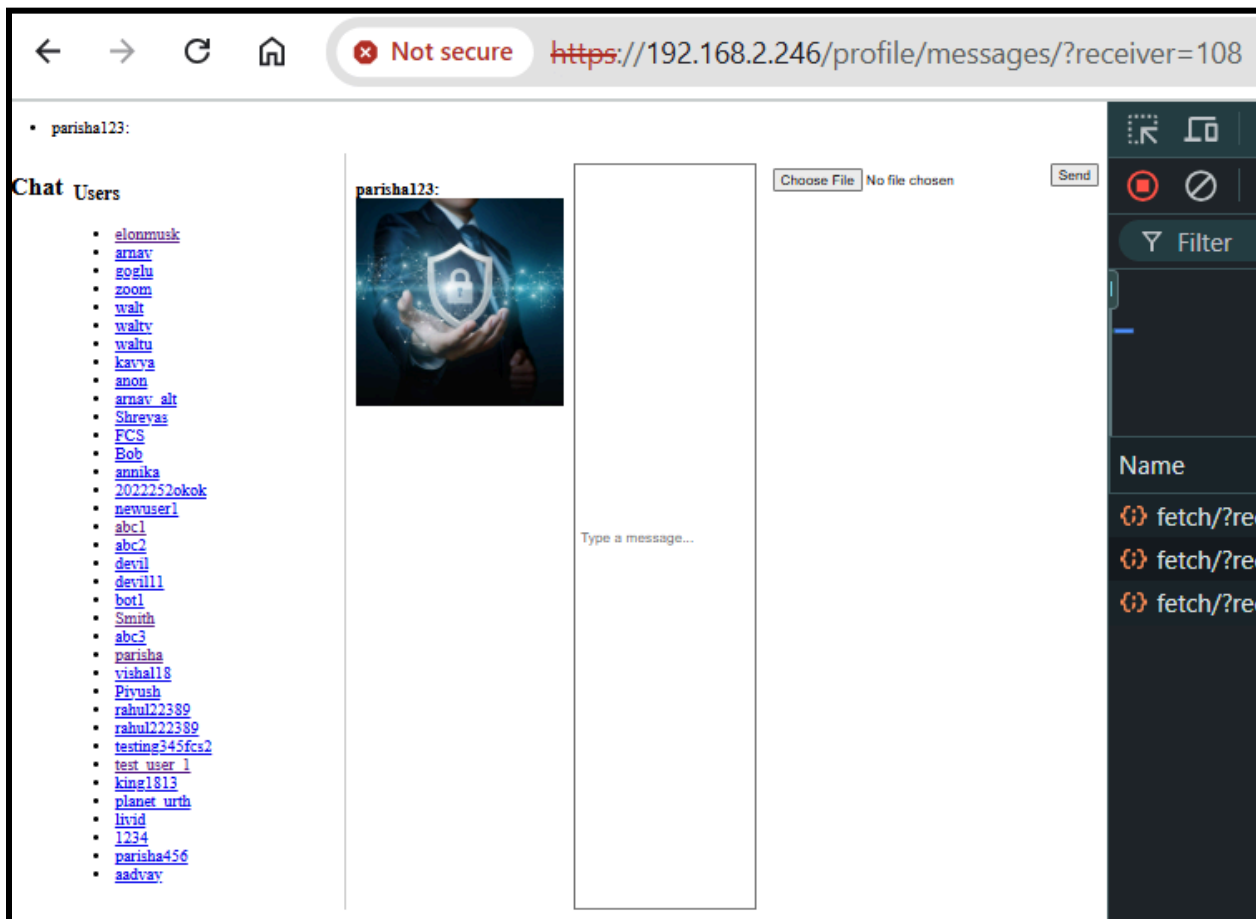

Impact:
This violates the requirement in the social features that user can block or report any suspicious accounts or content to the admin.
